

Your Independent Community Pharmacist Has Your Prescription for Deficit Reduction Ready

Your trusted, community pharmacist has something to say. Want to cut the deficit?

- Utilize local pharmacists to increase the appropriate use of low-cost generic drugs in Medicare Part D, Medicaid, and DOD/TRICARE.
- Reduce an estimated \$290 billion in avoidable health costs. Empower pharmacists to counsel patients face-to-face on proper medication use.
- Collect billions of dollars in drug manufacturer rebates retained by middlemen, pharmacy benefit managers in Medicare, Medicaid, and FEHBP.
- Reduce costly waste in mail-order pharmacy, particularly “mandatory mail” plans.
- Allow community pharmacists to continue providing advice and testing supplies to keep Medicare patients with diabetes healthy.
